ACL Compliance Director Ready for Market

ACL Compliance Director, a patented full-function network security software tool, designed to help customers efficiently manage network access control is now available! This software was designed in a customer-centric environment. It operates efficiently in a multi-vendor environment and functions with all major brands of routers and firewalls. The ACL Compliance Director gives customers a unified network security dashboard, empowering customers to strengthen network access control. Its use of algorithms enables customers to strengthen network security with fewer resources. This product is highly scalable and delivers real productivity for customers by managing thousands of routers intelligently, through a centralized ACL control dashboard. CEO, Phil Ruggieri, commented "The ACL Compliance Director has been developed with and for

demanding customers. It addresses and manages real world cyber threats, it speeds the deployment of security and compliance policies across large networks, all in a very rapid cycle time. ACL Compliance Director is a powerful network security solution, designed and implemented in a complex client environment. It is designed to help customers stay ahead of the cyber threat curve. Its dynamic design helps keep customers in a secure, controlled operating mode across their network, even as threat levels change."

Kevin Etheridge, CTO and inventor of the ACL Compliance Director, added, "The ACL Compliance Director empowers customers to substantially reduce costs incurred through troubleshooting, downtime, and information recovery, serving as a cost-efficient solution to a costly problem. We are committed to developing market driven solutions with customers, since customers provide

essential market validation of our technology. Our technology delivers the global network security businesses and governments are seeking."

The top requested features of ACL Compliance Director are:

- Centralized database with access control.
- Automated deployments to multiple devices of different types.
- Deploy the same list to all your routers/firewalls without any editing, even with different brands or types of devices.
- Hierarchal lists so that changes are automatically applied to the appropriate list and devices.
- Troubleshooting tools for searching and testing.
- Tracking tools with the ability to rollback to any previous point.

Cyber DAN : New Version to be released Feb. 2008

2007 has been a huge success for Cyber DAN not only in sales but in its reputation nationally. In November, Cyber Operations and Cyber DAN were invited to participate in the Global Gaming Expo in Las Vegas, Nevada and received thumbs up for Digital Advertising within the gaming community.

In October, it was announced that Cyber DAN v2008 had begun development, and it is anticipated to be released February 1st.

Some of the new features will include:

- WiFi access
- Multi-screen display
- Static logos
- More enhanced server management tools

It is estimated \$500 billion is spent each year on advertising and is currently dominated by TV, newspapers and magazines. B2B digital advertising revenue will pass B2B print ad revenue by 2009, according to Outsell's

"B2B Trade Publishing & Company Information: 2007 Market Forecast & Trends Report." Cyber DAN v2008 will enhance the experiences of Digital Advertising and Distribution of media throughout the market, enabling wider and more potent distribution. As the marketplace shifts to a digital interactive environment, Cyber Operations and Cyber DAN will continue to deliver emerging technologies and cost saving solutions.

Security Consulting & Training with SSI Alliance

Cyber Operations has built a platform that provides an integrated security and communications platform to the world.

Security Solutions International (SSI) and Cyber Operations, Inc. launched a strategic alliance in October. Cyber and SSI will jointly develop and market security training programs and consulting services on homeland security for corporate and government entities. Together, SSI and Cyber Operations will engineer SSI's homeland security training assets to create a "Homeland Security Best Practices" digital media content library. The content for the training programs will be managed and delivered to customers on a secure private network using our digital network solution, Cyber DAN. Also, SSI and Cyber will team to provide consulting services for physical and virtual security programs in access control, network security, information protection and first responder training.

Cyber Operations CEO, Phil Ruggieri, commented, "By teaming with SSI, we will offer proven training as part of the development of a secure private network, delivering homeland security support to corporate customers and government agencies.

SSI has a track record of exper-

tise in providing training and exercises for hospital and medical staff, regulatory personnel, local emergency managers, federal on-scene coordinators and first responders from law enforcement and fire services. SSI's programs fit very well in our business framework to deliver integrated technology solutions to corporate and government security projects."

SSI President, Henry Morgenstern added, "At SSI, we have trained over 400 Federal, State and local agencies based on global best practices for security and counter-intelligence processes. We have leading-edge programs in a wide variety of fields, including specialized counter-terror training, threat assessment, medical emergency preparedness, campus and building safety, school safety training and more. We conduct training in the US and overseas - bringing best practices to our clients. We are excited about our partnership with Cyber Operations, since the power of their technology will help us multiply our customer reach, and bring training to clients across the US and the globe.

Our mission is to help customers protect critical infrastructure in government, commerce, travel and schools. SSI's expertise, combined with Cyber Operations technology is a strong alliance to deliver that security solutions to a global market."

SSI® - Security Solutions International is a Miami based company, that has developed and is delivering training for First Responders in the US in counter terror planning and implementation. The company has trained Federal, State and local agencies based on global best practices and experience on security and compliance practices. SSI offerings cover security and counter-terror awareness and operational training, threat assessment techniques; hospital emergency preparedness; building safety; aviation sector processes, and school safety training. The company is best known for its Homeland Security international training missions, bringing global best practices in security to corporate and government clients.

Cyber Update: Products and Goals

Cyber Operation is unique because our goal is to provide a single source solution to our customers that meets or exceeds their needs.

All businesses require physical and logical security, dependable and affordable communication options as well as the ability to distribute digital messages anywhere at anytime.

It was five years ago that this concept was recognized and Cyber Operations began

building the foundation that is our company today.

This foundation included the development of many different products by in-house software developers and design engineers, implementing suggestions of our private and government partners.

There are six patents issued or pending pertaining to Cyber specific products.

Today, Cyber Operations has become a leader in providing a

complete end-to-end solution to our customers.

Utilizing Cyber SAM, Cyber DAN, ACL Compliance Director, Tadiran Voice Systems, International VoIP Connectivity and Certified Structured Cabling, Cyber Operations has built a platform that provides integrated security and communications solutions to the world.

Cyber Expands with the MDV Division

The MDV division has successfully initiated and continues to look promising in the future...

Effective July 18, 2007, Cyber Operations, Inc. announced that the team had expanded with the appointment of Patrick Tackney as Vice President of Solutions Sales. Tackney's experience and knowledge in voice data networks both international and domestic, as well as the knowledge of hardware and software are a great asset to the sales team at Cyber Operations. His diverse experience of leadership will help to drive the sales force for Cyber. His previous records of profit growth and revenue show the great potential he provides. His responsibilities include the Cyber Operations Federal Accounts in and around Washington D.C. as well as projecting forward the international telecommunications division and driving the sales to commercial clients for Cyber.

The MDV division expanded further on August 27, 2007, by appointing Roxy Griffith to the position of Director of International Business Development.

Griffith works closely with Tackney to further Cyber's success in the long distance telecommunications field. International routes are set up to execute quality termination into other countries via IP connections. Currently, Cyber Operations, Inc. terminates calls with Tier 1 companies in the USA and PTT companies abroad. Cyber Operations, Inc. is a classified 214 licensed International Telecommunications Carrier. The MDV division has successfully initiated and continues to look promising in the future, currently holding 22 executed contracts and several others in negotiation. Cyber Operations, Inc. continues to grow through new developments in technology that support the featured products as well as the recent team expansion in the international telecommunications division. The international telecommunications division further completes the technology package offered by Cyber that is essential to the corporate enterprise.

New Employees Join The Cyber Team

Roxy Griffith

Roxy Griffith joined Cyber Operations in August of this year, working in International VoIP Telecommunications (MDV Division). Griffith is

Director of International Business Development. Roxy grew up in Centre, AL and attended University of Alabama at Birmingham where she graduated with a Bachelors of Science in Psychology May of 2006.

Richard Anton

Richard Anton came on board in August as Cyber's Senior Software Developer in the Engineering Dept. Richard's main focus has been finalizing the

updated ACL (Access Control List) Compliance Director and testing our FLM-ANT software program. Anton brings extensive experience in software development and was a co-inventor of a Cyber patent.

Mark Swigart

Mark Swigart was hired at in late September as a Field Engineer Technician. Swigart brings 12+ years of experience in the field of telephony to Cyber and received his Tadiran Cer-

tification as a trained Technician over 2 years ago. Mark was born and raised in the Birmingham area having spent most of his time in Alabaster, AL.

Laura Luther

Laura Luther joined Cyber Operations in July as a Billing Clerk in the Accounting Dept. Laura has 20 years experience in Bookkeeping and Customer Service and

focuses mainly on accounts receivable and purchasing. Laura grew up in Alabama and recently moved back to the Birmingham area after spending several years in Georgia.

A Note From Our President

PRESIDENTS CORNER

With 2007 coming to an end, Cyber Operations continues to reach new heights and setting the bar for next year. This year we have accomplished our goals of doubling last year's revenue, developing and releasing the newest versions of Cyber SAM, ACL Compliance Director, Marketing Cyber DAN nationally and expanding our Telecom resources. I am very excited to begin 2008 and look forward to the next generation of Cyber products. Congratulations to the

Cyber DAN debuts at NACS Show in Atlanta

When Southern Store Fixtures, Inc. attended the NACS Show (National Association of Convenience Store Owners) in Atlanta, Georgia to unveil its new merchandising display designs, they included Cyber DAN to show how the Cyber Operations Digital Advertising Network could enhance store, product and brand recognition and promotion by engaging customers at the point of purchase. The convention was held November 6-9, 2007 at the Georgia World Congress Center where over 1300 companies and over 23,000 attendees were on hand to attend education sessions and see the latest products and technology targeted to the convenience store market. The NACS Show ranks among the top 50 largest trade shows in the United States. Cyber Operations is excited about the opportunity and potential in working with Southern Store Fixtures to provide a Digital Signage Solution for their products and customers.

Rod Stephens, Marketing Director said "Cyber DAN offers us a unique opportunity to design a merchandiser that exhibits interactivity. We foresee this technology being utilized in many retail environments to advertise, inform customers and to simply help sell more product."

Southern Store Fixtures is located in Bessemer, Alabama and is an industry leader and provider of quality, flexible and versatile food merchandising solutions with a reputation for generating innovative solutions to unique merchandising applications.
